It's the doorglass that makes the difference.

ODL began with an idea. Character, desire, and innovation made it a reality.

Founded in 1945, ODL has a proud history of innovation. Today, ODL carries on the spirit of innovation as a leading global provider of doorglass for residential doors and other building products for the home.

Natural Light

Bring light in – without sacrificing privacy.

Decorative glass casts intricate patterns of sunlight upon the interior and exterior spaces of your home, while contrasting textures create depth and let you bring in light without sacrificing privacy.

It's the Doorglass that Makes the Difference.

Fascinate the eye with the pattern and texture of decorative glass.

Nouveau

Seedy Glass

Handcrafted Glass

The beauty of handcrafted glass is that every piece is different—slight bubbles, lines, and surface imperfections are all characteristics of glass and are not to be considered as defects.

Clear Renaissance Glass

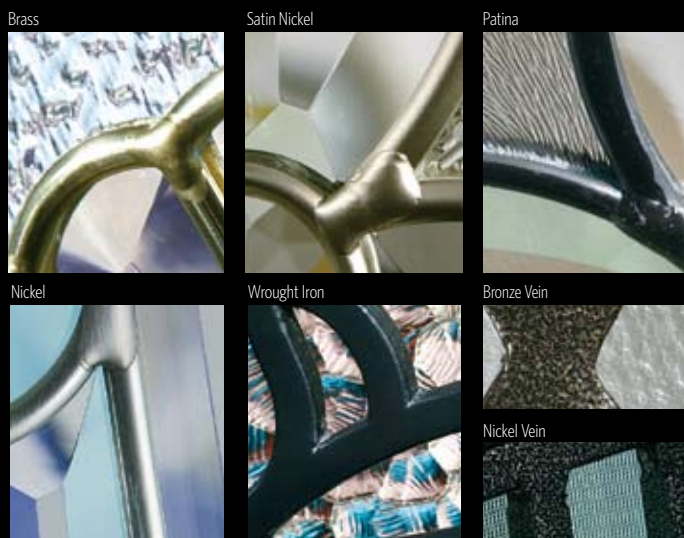

Clear=1

Opaque=10

Caming

Coordinate caming with your door hardware, outdoor fixtures, or interior furnishings.

Texture & Privacy

A wide selection of textured glass adds dimension, depth, and contrast to our designs. We give each design a privacy rating from 1 to 10 to help you choose the level of openness or obscurity you prefer.

Radiant Hues

5

Before & After

When consumers were shown homes with a solid door compared to a door with decorative glass, the decorative glass increased the home's perceived value by an average of 4 percent.
- ODL Proprietary Research

Curb Appeal

Increase the perceived value of your home.

It starts with a door and becomes an entry statement. Add a sidelight or two, a transom, or even a double door. There are dozens of shapes and sizes to configure your entryway. The more glass you add, the more impressive your entryway, both inside and outside the home.

Oak Park

Choose the right doorglass for your home.

Whether you are young - or young-at-heart - to making your own personal statement, we offer the very best selection of decorative doorglass that will appeal to all generations to come.

To simplify the selection process, we have grouped our decorative doorglass by style.

Maximizing natural light into the home is a green design principle.

A green home.

Doorglass solutions.

A green home doesn't have to compromise beauty or natural light. ODL has doorglass solutions that help conserve energy and improve indoor air quality.

Blinds can reduce solar heat gain up to 77%.

Decorative doorglass, Low-E doorglass, and doorglass blinds help control unwanted radiant heat gain.

e Look for Low-E

Energy saving. Comfortable living.

e indicates dooglass that is available with Low-E glass made with an invisible thin metallic coating that blocks heat flow. See page 80 or visit www.odl.com for more information.

ODL glass can be used in doors to meet Energy Star criteria.

Proven Energy Saver

Reduce Fabric Fading

Eliminate Drafts and Cold Spots

Reduce Condensation

Doorglass blinds and shades never need dusting. This helps improve indoor air quality and reduce exposure to allergens.

ODL Energy Star rated tubular skylights bring soft natural light into dark spaces.

RAISE & LOWER BLINDS

- Meets ADA requirements for accessible forward reach.
- Can paint or stain over pushpad controls.
- Cycle tested to ensure trouble-free operation.
- Raise & tilt at the touch of a button.
- Operates on four "C" batteries.

Sills

HIGH DAM SILLS AND ASTRAGALS

Sills available in the following finishes:

Satin Nickel Finish

Mill Finish

Bronze Finish

Brass Finish

High Dam Sills

The high dam sill features exclusive unibody construction and weather-tough materials to deliver maintenance-free reliability, even in the most moist and harsh climates.

Precision engineered rail adjust upward and downward for sealed tight protection. Counter beveled, two-piece, press fit screws easily adjust with a common #3 Phillips screwdriver.

Composite vinyl rail and nose retain "furniture" finish appearance in damp, inclement environments without showing signs of weathering, fading or staining.

Astragals for Steel and Fiberglass Doors

With our Astragals you no longer have to worry about poor performance from your French door systems. They eliminate water and air infiltration that is so common with other systems. Flush bolts are included. Outswing pairs include an aluminum security cover.

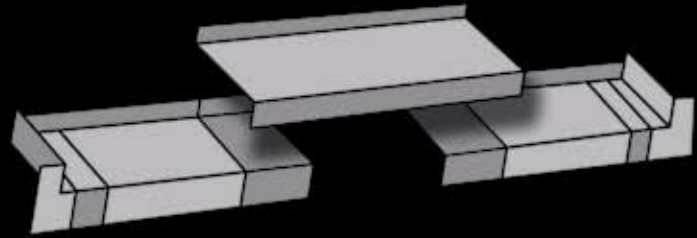

Jamsills, Packaging & Hinges

FROM IMP

Jamsill Guard

Jamsill Guard is an adjustable sill pan flashing for exterior doors designed to help prevent water damage from door leaks. This product has been time tested for over 24 years with over 1 million sold. It is able to accommodate most door applications in either 2 x 4 or 2 x 6 construction and is not visible after installation.

Telescopes for adjustability during installation

Packaging

Our product has the ultimate protection for transportation, storage, and on the job site.

Simple Solution™ Compression Corner Seal

Innovative design. Air pressure increases on the exterior side of a door system causing water to flow up the interior column of the weatherstrip. The Simple Solution™ blocks water under these conditions and the result is improved performance in a door system that will not leak.

Removing and replacing weatherstrip and corner pads during painting often results in gaps, damaged weatherstrip and improperly applied or lost corner pads. Endura now provides a protective plastic film covering to weatherstrip and Simple Solution corner pads, which allow these components to be left in place during painting of exterior frames and doors. Simply remove the film when painting is complete.

PF Frames™

FROM PLASTPRO

4-9/16, 6-9/16, 7-1/4

PF Frames™ from Plastpro, Inc. are an innovative new alternative to traditional wood door jambs. After extensive research and development, Plastpro has formulated a poly-fiber doorframe system that combines all the strengths and convenience of wood with enhanced properties that make it moisture, rot, and insect resistant. This unique formulation means that Plastpro's PF Frames™ will not absorb or wick moisture and will never warp, splinter, or rot. The advanced PF Frame™ system can be machined the same way as traditional wood jambs with no added hassles. Plastpro's PF Frames™ guarantee a long-lasting, rot-free entryway that will maintain its integrity today, tomorrow, as well as years down the road.

Embossed, Ready to Stain

White Capped, No Paint Required

Painted White

Features and Benefits

- Closed cellular structure ensures doorframe & molding will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Rigid poly-fiber formulation eliminates the need for an aluminum support channel.
- Easily machined just like traditional wood doorframe.
- More screw-holding power than wood.
- Matching composite astragals and mullposts offering sidelite and transom capabilities.
- Available in smooth semi-gloss white cap and stainable textured embossed.
- Available in various lengths.

swinging door

MULTI-POINT HARDWARE

Swinging Door

Multi-Point Hardware

Trilennium™ Multi-Point Hardware system provides more than just security . . . it offers homeowners better door closure and sealing than a single point lock. Featuring a durable and ergonomic design that allows for easy door operation.

I-beam construction incorporates greater strength, stiffness and security into the complete lock system. Its performance exceeds most industry standard security requirements.

Fabrication is easy utilizing W&F's template system, or for high volume automated routing equipment. Once the door is fabricated the lockset is 'let-in' and held securely into place with six mounting screws.

French Trilennium™ systems are available for the secondary panel of French-hinged applications with matching handle sets.

Varieties of handle sets and finishes available for your unique door or we can match a custom design to your needs.

Security and functionality are paramount when choosing door hardware, and you'll find both in Trilennium™, a truly innovative Multi-Point Hardware solution from W&F Manufacturing.

DEADBOLTED

LATCHED

RELEASE

Eclipse - Satin Nickel

Pinnacle - Bright Chrome

Eclipse - Victorian Bronze

Pinnacle - Brass

Lock Features

- Added Security - All 3 points latch and all 3 points deadbolt (1" throw)
- Release of the latch and deadbolt is a single downward movement (Intuitive North American Function)
- Roller construction for easy, low force operation
- Excellent impact testing performance
- Excellent cycle testing performance
- Top and bottom latch design allows for door misalignment and 3/16" pull-in when deadbolted
- Solid brass 5-pin cylinder with Weiser keyway, may be customer rekeyed to Kwikset, Master or Weslock
- Optional Schlage "C" cylinders
- Deadbolts include anti-saw hardened steel pin
- Standard heights for 6'8" and 8'0", - Custom heights available
- Template systems available for easy plunge router fabrication

Handle Set Features

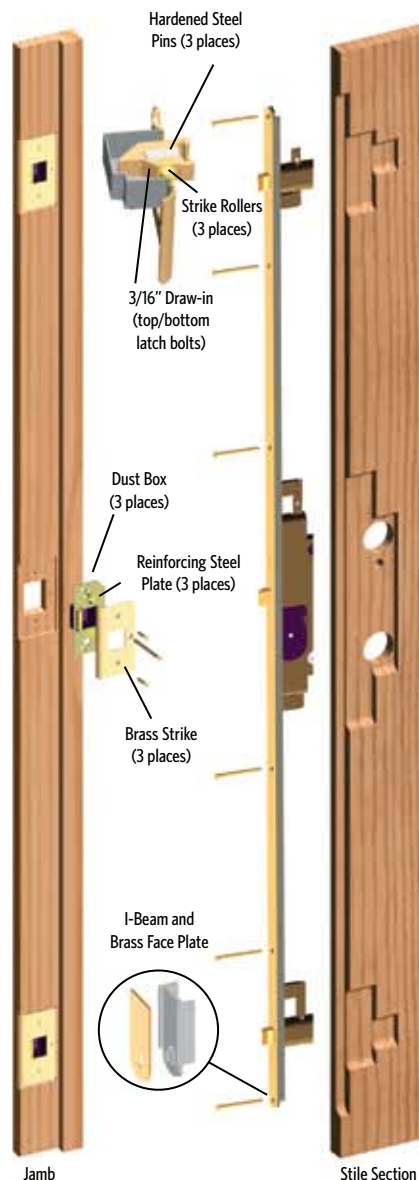

- Variety of styles and finishes available
- Visual locked/unlocked indication - 90° thumbturn rotation
- Solid brass strikeplates and faceplates
- W&F trim sets can drive our multi-point or traditional latch and deadbolt

System Features

- Proven design and reliability (over 10 years of field operation)
- Designed and manufactured in the USA
- French door thumbturn-driven shoot bolt systems
- 10 year residential limited warranty on materials and workmanship

Available Finishes:

- Bright Brass
- Bright Chrome
- Satin Nickel
- Victorian Bronze
- Solid Brass (PVD "Lifetime" Coating)
- Solid Bronze (Seven Patinas)
- Antique Brass
- Satin Chrome
- Antique Nickel
- White

Decorative Doorglass

ODL Decorative Doorglass is sealed between 2 panels of tempered safety glass and are insulated for air- and water-tight performance.

Thermally Sealed to Save Energy

Decorative Doorglass

Clear Tempered Safety Glass

Low-E Clear Doorglass

Available as a clear doorglass option, Low-E glass is made with an invisible thin metallic coating that blocks heat flow. A proven energy saver, Low-E glass reduces air conditioning costs by reducing solar transmissions in the summer. In the winter, it reduces heat loss to the outside and allows solar energy to pass inside. Available in Severe Weather, Blinds and Shades, Internal Muntins, and Clear Doorglass. **See www.odl.com for specific thermal performance information.**

- Allows solar energy in
- Reduces as much as 71% of heat loss
- Reduces drafts and cold spots

- Reduces direct sun rays
- Reduces cooling loss
- Blocks re-radiated solar heat
- Filters UV rays

REDUCES FABRIC FADING

Low-E glass protects fabrics, carpets and all coverings from fading by blocking up to 61% of harmful ultra-violet rays.

ELIMINATES COLD SPOTS AND DRAFTS

In cold weather, Low-E glass stays warm on the inside—minimizing cold spots and convection currents.

REDUCES CONDENSATION

Cold glass and warm, moist indoor air can cause damaging condensation. Low-E glass keeps glass warmer, which reduces condensation.

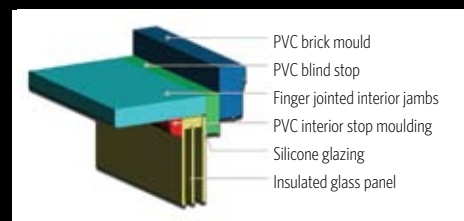

Decorative Privacy Windows

An added layer of obscurity brings in natural light, but blocks the view in - making these windows ideal for areas where you seek natural light, while maintaining privacy.

- Size: 4'0" x 4'0"
- Maintenance-free exterior frame - no painting!
- Energy-efficient
- Insulated tempered glass with an outside layer of obscurity glass to ensure privacy while still admitting light
- Available in 4 1/8" and 6 1/8" jambs

- PVC brick mould
- PVC blind stop
- Finger jointed interior jambs
- PVC interior stop moulding
- Silicone glazing
- Insulated glass panel

All ODL Doorglass features Safety Glass

Safety glass is up to four times as strong (impact resistant) as annealed glass. If broken, it shatters into many small fragments, which prevent major injuries. Tempered safety glass is produced from annealed glass using a heat treating process.

Frame Details

ODL offers a variety of frame options for you to choose from. See www.odl.com for more information about doorglass frames.

ARCHITECTURAL ELEMENTS™ FOR 3'0" DOORS

FLUTED SERIES

Ready to stain or paint. Will not yellow.

HP PRO™ FRAME

PAINT/STAIN READY & MAINTENANCE-FREE

Ready to stain or paint. Available in tan. Will not yellow.

HP FRAME

MAINTENANCE-FREE

No need to paint. Available in white. Will not yellow. Paintable with primer.

Quality You Can Trust

ODL Doorglass must survive our test of 50,000 slam cycles.

Blinds and shades are tested for 10,000 cycles.

Tempered safety glass meets requirements of ANSI Z97.1.

ODL products undergo extensive testing and quality checks and are covered by separate limited warranties.

This is to assure protection against air- and water-infiltration in accordance with ASTM standards.

This maintains the integrity of the entry door and its thermal performance.

Warranty

ODL products are covered by separate limited warranties. The warranty does not apply to damage from shipping, handling, installation, storage, environmental conditions, or unusual service conditions or usage. For warranty information contact: ODL Customer Service, 215 East Roosevelt Avenue, Zeeland, Michigan 49464, www.odl.com.
